Resume of Vinitha Sreenivasan 1 of 1

Book Board

Description: The responsive application allows creators of original works to upload their work (books, zines, comics, etc.) to a central marketplace, for reading by other users (consumers) of the application. Users can view their profile, which will show books they've uploaded, and other pertinent information. Consumers are able to search the marketplace by various criteria, in order to identify items of interest to them. Consumers can then view the item, or download. Consumers are able to leave reviews of the items they have read through which the creators can learn and improve their offerings.

Technology: HTML, CSS, handlebars, express, PDF.js and MySQL

URL: https://bookboardsite.herokuapp.com/

Repository: https://github.com/sreevinithaa/BookBoard.git

WhereToWatch

Description: it's an application designed to help movie enthusiasts decide which movie to watch and navigate where, and how to watch it, whether it be bought, rented, or streamed. A user can decide amongst a list of titles matching search criteria, check reviews and selected movie, check featured cast and their latest movies, and view information on where the movie is bought, rented, or streamed and where it can be accessed online.

Technology: HTML, CSS, jQuery and API

URL: https://sreevinithaa.github.io/where-to-watch/

Repository: https://github.com/sreevinithaa/where-to-watch.git
